| | | | |
|--------------|---|----------------------|-----------------------|
| Education | Rutgers University , School of Arts and Sciences | | New Brunswick, NJ |
| | <i>Bachelor of Science</i> , Mathematics + Computer Science | | May 2023 |
| | Cumulative GPA: 3.89 / 4.0 | | |
| | Selected Coursework | | |
| | Data Structures | Comp. Architecture | Numerical Analysis |
| | Probability Theory | Theory of Statistics | Combinatorics |
| | | Ordinary Diff Eqs. | Calculus I-III |
| Achievements | Online Encyclopedia of Integer Sequences (OEIS) | | |
| | <i>Contributor</i> | | |
| | <ul style="list-style-type: none">Discovered and published a new integer sequence in the OEIS (A339390)Contributed new interpretations to two previously published sequences (A2898 and A208425) | | |
| Projects | 3-D Lattice Paths | | |
| | <i>Project Leader</i> | | Nov-Dec 2020 |
| | <ul style="list-style-type: none">Under Professor Doron Zeilberger, researched the number of paths from (0,0,0) to (n,n,n) using various sets of acceptable steps using MapleDiscovered new integer sequences and new interpretations to previously known integer sequencesFound linear recurrence formulas/generating functions for such sequences, and analyzed their long-term behaviors, e.g. asymptotics, critical exponents | | |
| | Polynomial Operations | | February 2020 |
| | <ul style="list-style-type: none">Built a Java program that can add and multiply polynomials together, at specific values through text file input | | |
| Experience | Rutgers University - NB Mathematics Department | | |
| | <i>Undergraduate Grader / Teaching Assistant</i> | | Spring 2021 |
| | <ul style="list-style-type: none">Graded student assignments for Elementary Differential Equations | | |
| | Taiwan Summer English Camp | | Taoyuan, Taiwan |
| | <i>Summer English Teacher</i> | | July 2016, 2017, 2019 |
| | <ul style="list-style-type: none">Taught English to Taiwanese primary and secondary school students at a summer camp at Yuan Ze University over six weeks in collaboration with local university studentsDesigned new English curriculum every year over a three-month period prior to each trip alongside 10-20 other US high school and college students | | |
| Clubs | Undergraduate Association of Computer Scientists (USACS) | | |
| | <i>Member</i> | | September 2019 - |
| | Rutgers Quantitative Finance Club (QFC) | | |
| | <i>Member</i> | | February 2020 - |
| Skills | Java, Python, C, Maple (math software), MATLAB, HTML/CSS, \LaTeX | | |
